

Say It Through Pictures!

Name _____

Period _____

Body System Assigned _____

Group Members _____

Purpose

To construct a collage of pictorial analogies that represent your assigned human body system.

Materials

Collage materials such as pictures, photos, newspapers, drawings, etc.

Items to construct the collage such as scissors, markers, glue, etc.

Getting Ready

You should first complete a list of the parts of the system you intend to present. Along with the body part, you need to list what its function is, and the information you intend to convey to your classmates.

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

Brainstorming Picture Analogs

Now, you should decide on pictures that could represent the structures and functions of the items you listed above. For example, you may want to represent an eye with a picture and description of a camera. You may come up with more than one idea for each targeted structure. Name pictures that could represent the concept/part, and write them next to the number that corresponds to the concepts/parts listed in the section above.

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Collect your Picture Analogs

You may draw your own pictures if you wish. Otherwise, search through magazines, photos, newspapers, etc. for pictures that could represent one item of information through an analogy. Remember, these pictures are not supposed to be literal representations—in other words, don't put a picture of an eye when you are describing the eye!

Assemble the Collage

Key to Collage

You must attach a key to your collage. The key should identify each picture and explain what it represents. For example: "A camera captures pictures like an eye collects visual images."

Key: Body System Represented _____

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

Sharing of your Collage with the Class!
